

Multiple Award construction Contract (MACC) II

NNA12450885R-PFM

Questions and Answers-Set 4

April 5, 2013

Questions received after the pre-conference/site visit

Q50. On slides, N243 was presented. However, on the Statement of Work this building is not mentioned. Please advise.

A50. A revised Statement of Work has been posted on April 1, 2013, in FedBizOpps which updated the requirement. The revised Statement of Work will be incorporated in the Final RFP as revised Attachment J-6.

Q51. Section L, Page L-5, L.8 (b) (2) states that we are to provide a Cover Letter to Volume 1 which is to include "A completed Safety and Health Plan in accordance with NFS 1852.223-73, Safety and Health Plan. This Plan will not be part of the evaluation for award. The Plan will be reviewed and approved by the Contracting Officer before the selected awardee can propose on any potential Task Orders. The Safety and Health Plan is limited to 25 pages (See Section L.10(b) for page requirements)." Typically a Safety Plan is required in the administrative submittals post-award. Please confirm if the Government does indeed desire a 25-page Safety Plan be submitted as part of Volume 1.

A51. For this award, the offeror is required to follow Section L, paragraph L.8(b)(2), and complete the Safety and Health Plan in accordance with NFS 1852.223-73, Safety and Health Plan. This Safety and Health Plan will not be part of the evaluation for award. The Safety and Health Plan will be reviewed and approved by the Contracting Officer before the selected awardee can propose on any potential Task Orders. The Safety and Health Plan is limited to 25 pages (See Section L.10(b) for page requirements).

Q52. The specified working hours in the general requirements are normal working hours and states that a request must be submitted for approval to work outside of normal working hours. Due to the nature of the work and the impact it will have on the end users should we assume that the majority of the work will be conducted outside of normal working hours and an exception will be allowed for this project?

A52. For this Sample Task Order, refer to Attachment J-7, Restoration of Electrical Distribution System High Voltage Work Package 1-Specification No. K10018, Section 01 00 00 1.5 Hours of Work.

Q53. Will the Government outline or provide a laydown and or storage area for the temp storage of removed and received equipment?

A53. For this Sample Task Order, the Government will provide temporary laydown areas and this will be discussed at the pre-construction conference after award.
